PROFILE

Innovative and detail-oriented Software Developer with strong experience in full-stack development, and mobile app architecture. Skilled in React, Node.js, MongoDB, MySQL, and cloud deployment. Adept in managing both solo and collaborative projects, solving real-world problems with scalable and efficient code.

WORK EXPERIENCE

TeyWeb

2025 - PRESENT

Founder & Lead Developer

- Designed and developed a platform that lets businesses create personalized eCommerce websites with custom themes and subdomains.
- Integrated Flutterwave for seamless vendor payments, supporting direct bank transfers.
- Implemented hybrid database architecture using MySQL for core data and MongoDB for dynamic configurations.

Herald Web

2021 - 2025

Lead Developer

- Built a platform for schools in Nigeria to generate fully functional, customizable, and modern websites.
- Implemented core features to support school operations: online result generation, attendance tracking, student performance monitoring, and teacher activity logs.
- Enabled each school to manage their portal independently with custom branding and domain integration.
- Developed a robust backend for real-time data syncing and secure access to student records.

EDUCATION

B.Sc. Computer Science

2018 - 2022

Kwara State University, Malete

GPA: 3.57 / 4.0
